On account of the scarcity of radium the work progressed slowly, for it was seldom that more than one or two experiments could be conducted simultaneously. When it became certain that the facilities of the Garden laboratories would be available for an indefinite period, other work was made secondary to the radium problem, for the relatively large quantities of radium and radium preparations placed at my disposal created an opportunity too valuable to let pass unimproved. Chapter I. contains, in concise, non-technical language, information that is widely scattered in publications, many of which are not easily accessible or familiar to botanists. This information, however, is absolutely essential in order to understand the discussions that follow, and it was deemed advisable to include it. The problem was originally suggested by Dr. William J. Gies, Consulting Chemist of the New York Botanical Garden, and it is a pleasure to acknowledge his helpful suggestions during the earlier progress of the work. The investigations would not have been possible had it not been for the munificent liberality of Mr. Hugo Lieber, of the firm of H. Lieber Co., of New York City. Mr. Lieber has freely placed at my disposal some \$3,000 to \$4,000 worth of standard preparations of the purest radium bromide yet obtained, as well as weaker preparations of radium, polonium, and radio-tellurium. As stated in detail in the pages that follow, he has devised apparatus, and...
