

## Proceedings of the California Academy of Sciences Volume 1; Mathematics-Physics (Paperback)

Filesize: 2.89 MB

### ***Reviews***

*This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It's been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.*

*(Prof. Loyce Runolfsson Jr.)*

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 Excerpt: .upon certain occasions within the disc of the planet at disappearance, and once at reappearance. In every other case the occultation was perfect at the limb. This latter sentence was not quoted by Proctor. Dr. E. C. Pickering, Director of Harvard Observatory, has described an occultation of D. M., 230 1087 (7.3 magn.), by Jupiter, April 14, 1883. He used the fifteen-inch objective, with achromatic eye-piece, power 400. For a period of about ten minutes after disappearance was observed, the star is recorded as suspected. The record states that for some time previous to final disappearance the star alternately disappeared and reappeared without cause; seeing pretty good and uniform throughout. At the reappearance, the limb of the planet was watched continuously for forty-nine seconds, at the beginning of which the star was not visible, and at the end of which it was distinctly seen, remaining visible thereafter. In our experience in observing Jupiter, we have never seen the border sharply defined when using powers of 500, but atmospheric conditions have never been supremely good at the times of observation. In observing the occultation of Jupiter's satellites through an unsteady atmosphere, our fellow-observer, with a smaller telescope and objective ( 2 ) November 19, 1900. of two and one-half or three inches, lost the satellite much sooner than we observed its disappearance in the 6.4-inch Clark Equatorial, when we followed it into the factitious limb; and with a disturbed atmosphere this advantage should always pertain to...
