Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 Excerpt: .germs could be removed were unknown. To supply knowledge upon these points and others pertaining to the purity of water supplies, the Experiment Station of the State Board of Health of Massachusetts was established at Lawrence in 1887. Some of the more important general results of the six years of careful investigation will now be presented. A general description of the Station and the methods of investigation carried on there, together with the earlier results obtained, may be found in the published report on water supply and sewerage, entitled, Experimental Investigations by the State Board of Health of Massachusetts upon the Purification of Sewage by Filtration and by Chemical Precipitation, and upon the Intermittent Filtration of Water. Made at Lawrence, Mass., 1888-90. Additional results may be found in the more recent Annual Reports of the State Board of Health of Massachusetts. A model of the Experiment...
